Clear Budget

Monthly budget, paycheck plan, bills, debt and savings for Google Sheets and Excel

1	**Open it in your app**	Download the file from Etsy.com > Purchases on a computer (the Etsy phone app cannot download files) and save it; do not open it in a browser preview. Google Sheets: on drive.google.com choose New > File upload, pick the .xlsx, then open it with Google Sheets. Excel: double-click the file. There is no link to request and no access to wait for.
2	**Look at January, then clear it**	January holds an example month so you can see the math work. Select the shaded Date to Amount cells in January's log and press Delete. The Ready check below shows Done when it is gone.
3	**Fill in Setup once**	Type your take-home pay, then name your own categories, pick a group for each and give each a monthly budget. Aim for Left to budget = 0. Change or add categories any time; every tab follows.
4	**Log spending in this month**	Pick this month in the jump row below. Starting mid-year? Empty months stay out of your totals. Starting now, before the new year? Set the Year in Setup to this year and use October, November and December; in January keep that copy as last year's record and start this year in a fresh download, copying your Setup categories across.
5	**Check your Dashboard**	See the year by month and where the money went. Bills, Paycheck plan, Debt and Savings are extras: use them when you want them, skip them if you do not.

Ready check

Updates as you type.

Check	Status	What to do
Income entered	Done	
Every dollar has a job	Done	
Every category has a group	Done	
Spending matches your categories	Done	
No amounts without a category	Done	
Example cleared	To do	Clear the example in January (step 2)
Your split (info, not pass or fail)	Info	67% needs, 13% wants, 20% savings and debt (50/30/20 guide)

Jump to a month

January	February	March
April	May	June
July	August	September
October	November	December

If something looks wrong

A month total looks too low: check the Ready check for amounts without a category or with a category not in Setup.

A category is missing from the dropdown: add it in Setup (any empty row); it appears in every month.

I typed over a formula: Edit > Undo, or File > Version history in Google Sheets.

Amounts show $ but I use another currency: unprotect the tab (no password) and change the number format.

Colour key

Type here	Shaded cells are yours to fill in.
Calculated	Plain cells hold formulas.

Tip

Shaded cells are for typing. Plain cells hold formulas. In Excel they are locked; to change one use Review > Unprotect Sheet (there is no password). In Google Sheets, if you type over a formula, Edit > Undo or File > Version history brings it back.

Dashboard

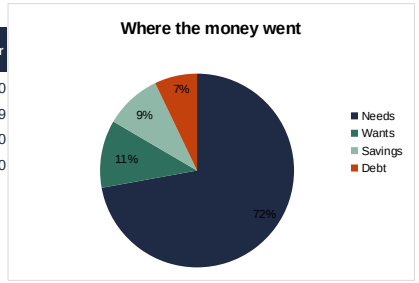

Your year at a glance. Nothing to type here.
